RESEALABLE SYSTEMS

Re-closable Film

This is an **innovative packaging system** that allows the opening and reclosing of the plastic film, through **self-adhesive integrated labels**. Through the application of special adhesive labels this produces perfectly resealable films, suitable for packing food, chemical and industrial applications. The process returns a roll that is compatible with all industrial packaging installations.

Packaging Types

The system can be used on most common industrial packaging machines. It is suitable for bags produced by vertical packaging machines, flow packs and any type of container, preformed or thermoformed. Many film types and compositions are suitable for the application of the label, from simple monofilms to laminated PET, or BOPP.

BENEFITS

The system provides a number of advantages for both the producer and final consumer.

BENEFITS FOR THE CONSUMER:

- Functional and eco-friendly. Once the product is opened, there is no need to re-wrap it with stretch film, or use other containers.
- The package integrity is guaranteed by the warranty seal.
- Easy opening thanks to the easy peel tab.
- Ideal for products with repeated use/ consumption, resealable up to 24 times.
- The product's shelf-life is guaranteed through the use of barrier or transpiring materials.
- Waste caused by the product's deterioration is minimised.

TECHNICAL PRODUCTIVE BENEFITS:

- Suitable for all automatic packaging systems.
- No need for any modification or adjustment to the packaging machine.
- Easily integrated, application does not slow down packaging line.
- No waste, both in terms of time and materials.
- Applicable to most of the semi-rigid or flexible packages currently on the market.
- Strong visual impact.
- Customisable for shapes, sizes and graphics. Printable in up to 10 colours. Available in matt varnish and paper.
