

Packaging & Consumables

JENKINS
FRESHPAC SYSTEMS
Total Packaging Solutions

Jenkins Freshpac Systems offers a wide range of packaging materials for the fresh fruit and vegetables sector.

SORMAPACK - High impact bag in woven net and film

Traditional net with the addition of two sealed film bands; these are printable in continuous with up to 8 colours and high photographic resolution. Net is available in all colours. This pack is ideal for citrus fruits but can also be used for avocados, chestnuts, potatoes and onions. Packs from 500g to 3kg.

VERTBAG - High Impact vertical bag in extruded net and film

The film is also available in clear vision, can be printed with up to 8 colours in high resolution. Printing may be centred or in continuous. It can contain different produce such as potatoes, onions, citrus fruits, green beans, legumes, garlic, shallots, nuts and chestnuts. Packs from 250g to 5kg.

MULTIPACK - Range of packs in net and film

Thanks to Sorma's latest creation, CBR packing machine, it is now possible to pack different bags with the same machine. Vertbag in extruded and woven net, Vertbag with handle and Sormapack. The film can be printed with up to 8 colours in high resolution. Printing may be centred or in continuous. Suitable for potatoes, onions and citrus fruits. Packs from 1kg to 5kg or Sormapack from 500g to 3kg.

NEW VERTBAG - High impact vertical bag

It is more attractive thanks to its new rounded shape and more visible handle designed for a better hold. The printing is front and back to increase communication. Packs from 1kg to 3kg.

TUBULAR - High impact bag in extruded tubular net and film

New vertical tubular pack for calibrated produce. The film can be printed with up to 8 high resolution colours, centred or continuous. The extruded net (available in all colours) allows the produce breathe. Suitable for onions, lemons and grapefruit. 3 or 4 fruit pack.

LABELS - High impact self-adhesive labels

We pride ourselves on being a very important link in your branding and marketing chain. Labelling today is as diverse as the packaging it appears on and sometimes the label is the package! Anti-tamper devices can be incorporated into labels; products can be tracked by labels and we have also pioneered labels that can tell you the ripeness of fruit! Connecting with the end user is increasingly important; you can do this many ways with our labels.

Automation & Machinery

JENKINS
FRESHPAC SYSTEMS
Total Packaging Solutions

PROUD TO BE A LEADING SUPPLIER OF COMPLETE AUTOMATION SOLUTIONS

Due to limited availability and ever increasing labour rates, post-harvest and packing facilities are looking to technology as a means of achieving projected throughput and minimising ongoing costs. We lead the industry in supplying cost effective solutions that require minimum human intervention and maintenance.

Palletisation equipment, strapping machines, packing and filling equipment and total weighing solutions relating to all aspects of the fruit & vegetable industry are some of the services that brand us the best in our business.

REPRESENTING INTERNATIONAL COMPANY SORMA

We also represent Sorma, an international company who provides many types of weighing, bagging, punnetting and palletisation, pallet strapping and CMB Labelling Innovations. Sorma have also developed fully automatic online systems for kiwifruit & pipfruit carton labelling.

Pack house automation is a somewhat delicate art, so you need the best tools available at your disposal. When automation is done correctly, it reduces operating costs and frees up capital for other endeavours.

We have a mobile network of staff, so our services are available anywhere in New Zealand. If you require a quote on pack house automation or any other form of labelling equipment, we will come and see you anytime.

MAINTAINING YOUR CONNECTION TO THE COMPANY

Our after sales support service is here to build relationships. Of course, we remain experts on all the equipment we supply so that our clients will feel they can contact us about anything. This relationship is founded on trust and competent service.
