ECOPUNNET

High Visual Impact (polypropylene handle + net) pack that is closed by thermo-sealing

It is in fact a mono material (polypropylene) and sealed without a metal clip. EcoPunnet has ample printing area on the handle and can handle high resolution printing up to 10 colours. The film is a practical handle as well as ample support for communicating the brand and product information. The stretched extruded net used in the EcoPunnet lets the produce breathe, enhancing its shelf life and gives full visibility of the product without hiding it.

FLOWPACK

High Visual Impact with or without handle (flexible film) pack that is closed by thermo-sealing.

Film in bi-oriented polypropylene with or without customised printing. Macro-perforated; the film without macro-perforation is also available with anti-fog.

FLW-150 PACKING MACHINE FOR PUNNETS

The FLW-150 is a high production and user friendly packing machine. Easy to operate, it guarantees total accuracy in the printing pitch as well as the position of the variable data. The length of the handle is managed independently from the net; this allows a better adherence of the net to the punnet. The FLW-150 is equipped with a mechanical arm which enables the machine operator to change the net roll, quickly and without any effort.

Pack size range up to 1kg

Packaging Machine that performs the task of wrapping punnets containing fruit and vegetables in plastic covering with either net or film.
Type of Punnets: width: min.100mm / max. 150mm; length: min. 140mm / max. 300mm; height: min. 50mm / max. 120mm

High productivity thanks to its speed and reduced downtimes

Versatility – FlowPack with handle, Ecopunnet with handle and Flow wrap without handle (3)

Safety - It is equipped with a coil feeder.

FLOWPACK OPTION

- Flexible film for vertical and horizontal packing
- Film in polypropylene bi-oriented, heat welding
- Macroperforated, the film without the macroperforation is also available in anti-fog version
- Customised printing
- Adhesive label option
- Variable print data on handle (e.g. barcodes, QR codes)
- Packs from 250g to 1kg
- Production speed up to 45 punnets per min
- oppx film
- oppx + cast handle (equivalent to BOPP)
